

Craftsmanship, charm, reliability, and a family history of excellence all come together in a Copper Sculptures lantern.

The intersection of art and history.

COPPER SCULPTURES: BRINGING YOUR VISION TO LIGHT

Bill Shook's passion for copper creations began in Starkville, Mississippi, in the 1960s. Working for a company that built grandfather clocks, he would often purchase scraps and build wind chimes in his spare time—just as a hobby. Wind chimes led to fountains, and eventually, Bill's hobby led to true craftsmanship, and in 1986, Copper Sculptures was born.

Kathy Shook joined the venture to take over sales and a true family business blossomed. Today, Bill and Kathy's children Kimberly Mistal and Jeremy Shook handle day-to-day operations. With an eye for interior design, Kimberly manages sales, marketing and design consulting. Jeremy's degree in industrial technology shines through as he uses his 10+ years with Copper Sculptures and passion for delivering superior quality to provide customers with lighting that is functional, artistic and one-of-a-kind.

A burning light has long been used as a symbol for vacancy—traditionally serving as a way to show travelers they were welcome to stop and rest along the journey from one place to the next.

The Shook family business can relate. With gas lights burning outside Copper Sculptures since 1995, enduring hurricane winds and the unpredictable weather of South Mississippi, this is a business that welcomes you and your custom ideas. Over the years, Copper Sculptures has set the standard for elegant, handcrafted lanterns; however, the expertise of the Copper Sculptures team does not outweigh the significance of its dedication to customization and, most importantly, customer service. Each customer's desires are heard and become embedded in the final lantern design.

At Copper Sculptures, the lights are always on because your vision is always welcome.

HANDCRAFTED WITH ATTENTION TO DETAIL

From a project's beginning to end, our customers' desires are kept top-of-mind. Before production, customers will meet with a Copper Sculptures Design Consultant to discuss product details and style. From there, an approved design is sent on to the Drafting Department for pattern and schematic development. The intricate process continues as our sheet metal craftsmen and coppersmiths take over, eventually passing the lantern on to an acid bath as the welders complete a decorative steel bracket. Lastly, blacksmith and coppersmith crafts are combined in our Glass and Testing Department. It's there that we ensure each lantern is tested to the highest safety standards to meet building codes. Before any project leaves our shop, our Quality Control Department analyzes the lanterns by those strict standards.

As one of the few remaining companies in the world handcrafting copper lanterns with open-flame burners, we take our job seriously. In fact, Copper Sculptures has been setting the standard for years as we were the first company to produce lanterns using electronic ignition and one of the only companies to successfully burn using propane.

Each lantern is a work of art—individually sculpted to bring out the elegance of period lanterns and to enhance our favorite contemporary characteristics. We build our lanterns of 100% solid copper with no lead to melt, allowing us to provide our signature, custom quality. . . . guaranteed for a lifetime.

We offer natural gas, propane and electric lanterns with candelabra base options featuring two- or three-stem clusters. Our lanterns are UL Certified, ensuring your safety both indoors and outdoors.

SIGNATURE SERIES

TIMELESS ELEGANCE

Our Signature Series emphasizes what we do best: handcrafted, custom-made details created for each individual customer. The wide array of design options allows you to create that "signature look" to turn your house into a home.

Each style is available in various sizes, can be wall mounted, post or column mounted, or hung from a ceiling by yoke or chain. All styles are offered with your choice of either a glass top or solid copper top. There are many ornamental add-ons available.

CUSTOM LANTERNS

LIKE NO OTHER

While we have many styles for you to choose from represented in our catalog, all lanterns are made to order and handcrafted specifically for you. Not all available designs are featured within the catalog, so feel free to contact us to discuss custom options. All styles are available as wall or post mount,

or may be hung from the ceiling by yoke or chain. Copper Sculptures lanterns can be developed for any architecture, any size, any location, and you even have your choice of the shape of your flame! Call us today for a detailed line drawing of the size and style you're seeking.

BOTTOM SCROLL

25

A Copper Sculptures lantern starts its life as an idea, a vision. Each lantern is custom-made to order.

TO OUR TRAINED PROFESSIONALS

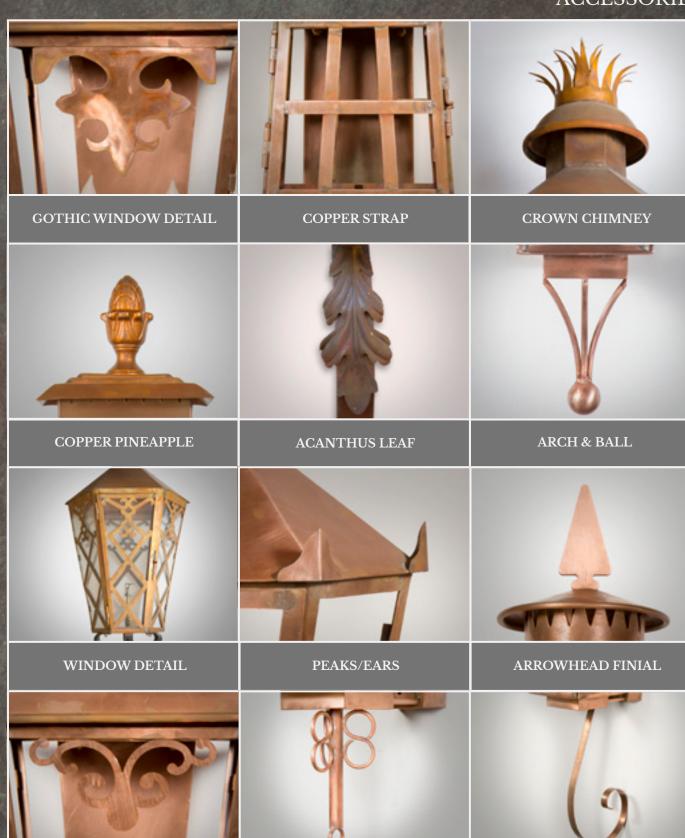

Our in-house designer works closely with each customer to develop the perfect gas fixture for you. The finish, size, style and every other aspect of the piece is carefully considered and planned.

BRING YOUR IDEAS TO LIFE

That idea becomes reality as our artisans bring years of experience to each step of the process. Each craftsperson focuses on a particular aspect of the lantern creation and assembly with attention to detail and quality.
